Grid Asset Information

The grid owner advises the Te Mihi – Whakamaru 1 circuit is now scheduled to return to service tomorrow, Friday 20/11/26 at 18:30.

Updated studies for the Te Mihi - Wairakei 1 circuit outage planned for 22-23 November indicate that geothermal generation will not be restricted to minimum run MW quantities during that outage, accounting for geothermal generation outages currently in POCP. This means restrictions on geothermal generation will be lifted upon return to service of the Te Mihi - Whakamaru 1 circuit.

A revision of this notice will be issued if there is any change to the situation above.
