

Welcome to OHMS training for service providers

- We're excited to have reached the point where we can offer OHMS to our service providers
- Your trainers today are **Pravin** and **Callum**
- Today's session is a mix of demonstration and some hands-on practice in the OHMS training environment
- Ask questions as we go – we've also got time to revisit any questions during our wrap-up

Agenda

14:05 Welcome and intros

14:15 Introducing OHMS release 1

14:35 Demo

15:00 Practice activities

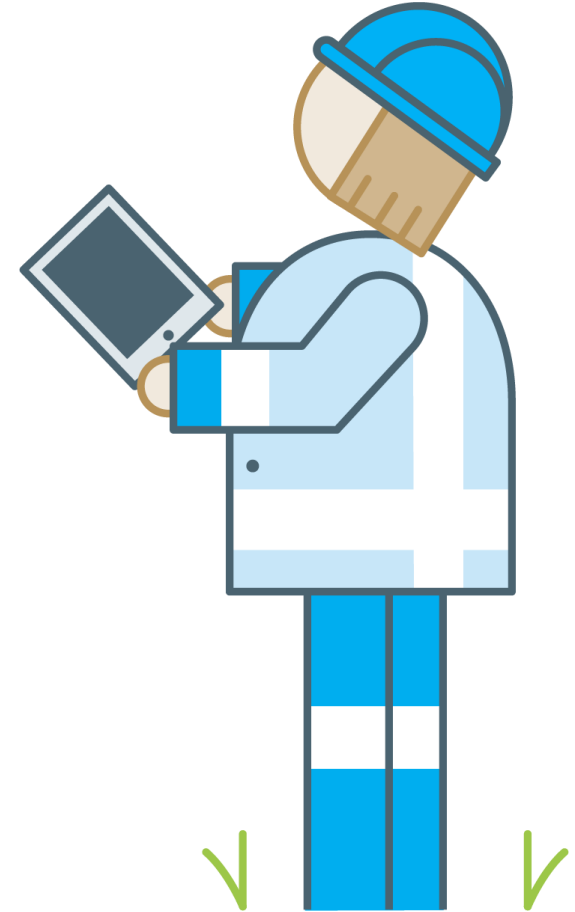

15:30 Regroup and debrief

15:40 Feedback on OHMS

15:50 Wrap up

What we'll cover

- When and how you'll use OHMS
- Navigating OHMS
- Searching to find outage windows and outage blocks
- Filtering searches
- Using calendar view

Expectations

- Cameras on please
- Mute mics
- Ask questions – use the 'raise hand' function, or
- Use the chat

Draft 26/27 AOP available

20 October 2025

The draft 26/27 AOP is available for our Service Provider Outage Planners to view in OHMS.

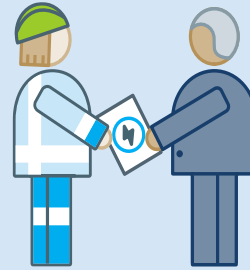

IONS & OHMS

- **Start:** SP Outage Planners view the draft 26/27 AOP in OHMS.
- **Continue** using IONS for all other Outage Planning tasks, including those related to the 25/26 Outage Plan.
- **Stop** using IONS to view the draft 26/27 AOP.

Draft 26/27 AOP published

31 January 2026

Draft 26/27 AOP is published back to IONS, enabling changes to be made to the AOP in IONS. All users stop using OHMS during this period.

IONS only

- **Start** using IONS for *all* Outage Planning activities, including updates to the draft 26/27 AOP.
- **Continue** using IONS as the source of truth for all planned outage information.
- **Stop** using OHMS for *all* activities.

OHMS release two

March 2026

All Outage Planning activity is now carried out in OHMS, and IONS is no longer in use.

OHMS only

- **Start** using OHMS for *all* Outage Planning activities. OHMS is the source of truth.
- **Continue** using the same *processes* to complete Outage Planning activities.
- **Stop** using IONS for all activities.

OHMS demo

Practice activities in OHMS training environment

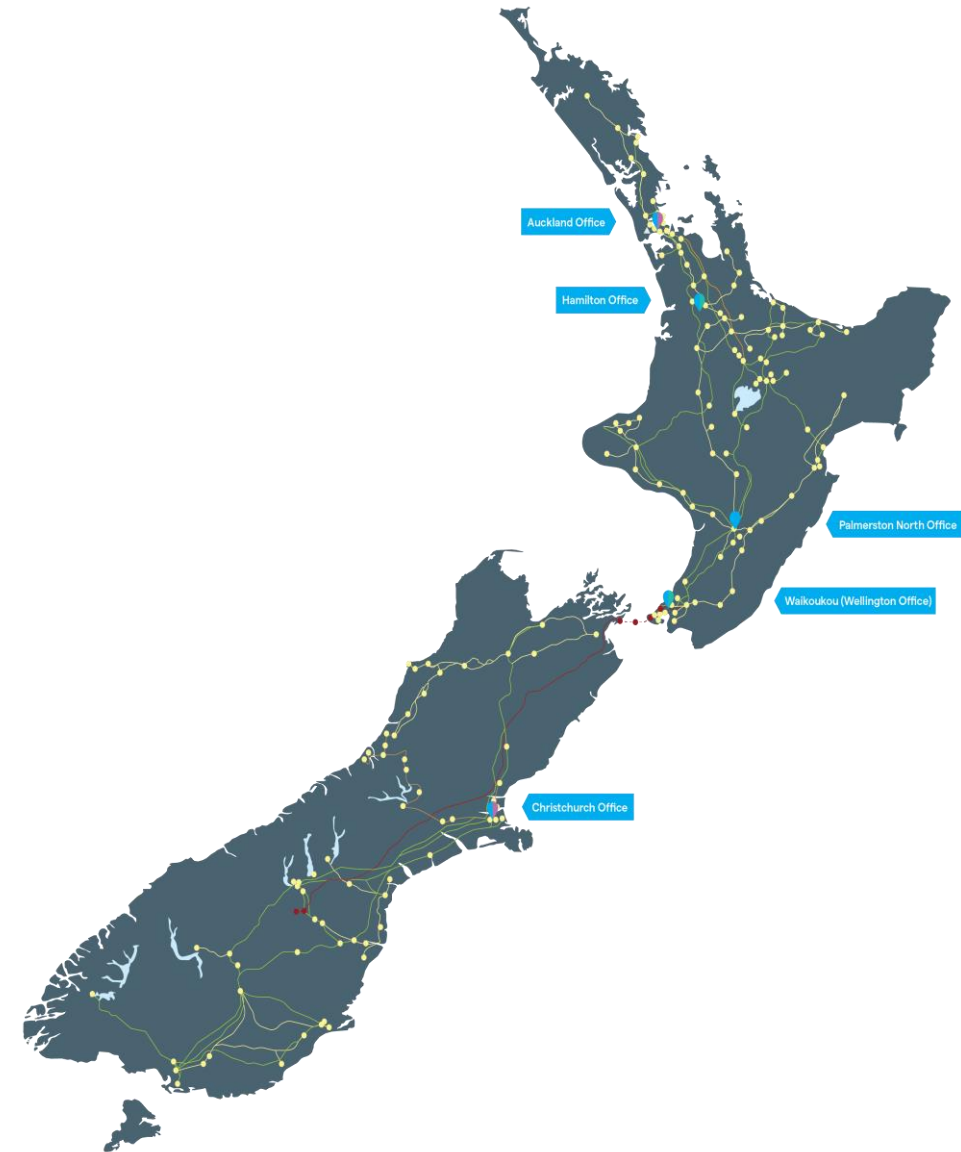

Activity recap

- **In the activities, you covered:**
 - Navigating OHMS
 - Searching to find outage windows and outage blocks
 - Filtering searches
 - Using calendar view
- **Any comments, insights, questions?**
- **You'll use OHMS to view AOP**
- **Available once you've completed the training (i.e. from 20th)**

Support

- OHMS R1 Service Provider QRG available – link in chat
- Transpower Outage Planners available for advice and support.
- FAQs and session recording will be available after our last training session (20th Oct)

OHMS feedback

- As we develop OHMS we're interested in your feedback and suggestions
- Take a few minutes to reflect on the activities and what you've seen so far.
- Type in chat:
 - *What do you like?*
 - *What would you like to see introduced?*
 - *What could we change?*
- If you have feedback later, talk to your Outage Planner

Wrap up

After the training

- Survey link will be sent to you shortly, please complete (should only take 2-3 mins)

Thanks for your participation!
