Tēnā koe,

Powerco's cross-submission on Transpower's System Operator Rolling Outage Plan Review

Powerco Limited (Powerco) welcomes the opportunity to provide feedback on views submitted in relation to Transpower's proposed changes to the System Operator Rolling Outage Plan.

Wellington Electricity's submission sheds light on the challenges and costs associated with the proposed requirement for EDBs to provide half-hourly GXP level demand forecasts upon notification of savings targets (question 13). Like Wellington Electricity, Powerco lacks readily available tools to meet this requirement. Introducing such capabilities could entail significant expenses for Powerco in terms of development, maintenance, and ongoing use.

If you have any questions about this submission, please contact Nathan Hill (Nathan.Hill@powerco.co.nz).

Nāku noa, nā,

Stuart Dickson
General Manager, Customer
POWERCO
