Revision of:

Gore-Roxburgh Circuit Overload Protection Scheme (GOR_ROX COPS)

Transpower advises the commissioning of the Gore Roxburgh Circuit Overload Protection Scheme (GOR_ROX COPS), currently scheduled for the 4th of September 2026.

The GOR_ROX COPS is intended to protect the GOR-ROX-1 circuit during high south flow conditions. The scheme monitors the flow on the GOR-ROX-1 circuit. If the circuit load exceeds 100% of its seasonal rating and flow direction is from ROX to GOR, then after a 5.5 second time delay the scheme will trip the GOR-ROX-1 circuit.

This scheme will be enabled under normal operating conditions.
