Revision of:

Kaikohe_ Maungatapere 1& 2 Circuit Overload Protection Scheme (COPS)

Transpower advises the commissioning of the Kaikohe-Maungatapere 1& 2 Circuit Overload Protection Scheme (COPS) on the 10th of December 2025. The purpose of the scheme is to reduce the need for pre-contingency constraints on the generation within Top Energy's network by allowing Kaikohe-Maungatapere 1 and Kaikohe-Maungatapere 2 circuits to be operated up to 95% of their seasonal ratings.

The scheme reduces the generation within Top Energy's network in response to an overload on either the Kaikohe-Maungatapere 1 or Kaikohe-Maungatapere 2 circuits and will trip the affected circuit if the generation cannot be reduced within an appropriate time.

The scheme will normally be enabled. The scheme should be disabled if either Kaikohe-Maungatapere 1 or Kaikohe-Maungatapere 2 circuits are out of service.

...

A revision of this notice will be issued if there is any change to the situation above.
