Revision of:

Round power status change

Transpower, as System Operator, advises there will be live line work undertaken on Benmore-Haywards-2.

This work is scheduled for the following timeframes:

- Monday, 16th February 2026, 07:00 – 18:00
- Tuesday, 17th February 2026, 07:00 – 18:00

Round power will be disabled during this work, preventing HVDC reserve sharing in the reverse power direction below the monopole minimum transfer.

Frequency Keeping Control (FKC) will remain enabled for this work. Island-based Multiple Frequency Keeping (MFK) will be used during low transfers while Round Power is disabled.

For further information on the System Operator's business process for disabling and enabling FKC during HVDC monopole operation, go to:

<https://www.transpower.co.nz/system-operator/information-industry/operational-information-system/frequency-keeping-control-and>

...

A revision of this notice will be issued if there is any change to the situation above.
