Huntly–Ōtāhuhu A reconductoring project - short-list consultation

Genesis Energy Limited (**Genesis**) welcomes the opportunity to comment on Transpower's *Huntly–Ōtāhuhu A reconductoring project - short-list consultation paper*. We support Transpower applying to the Commerce Commission to progress its preferred option (option 2 within the paper) for reconductoring two sections of the 220 kV duplex double circuit Huntly–Ōtāhuhu A line (HLY–OTA–A). From the consultation paper, we understand the isolation point for this work will be done at Huntly Disconnect Switch 646 and Earth Switch 649 and that this would allow Huntly Unit 5 to be connected to both the 'A' and the 'B' Bus, which we support.

Yours sincerely,

Mitchell Trezona-Lecomte

Senior Advisor, Government Relations and Regulatory Affairs
