

## **Application of the TPM:**Grid Pricing consultation schedule

This schedule shows our current expected timeline for upcoming consultations and engagements necessary to give effect to the Transmission Pricing Methodology (TPM). These timings are indicative. We will provide more definitive dates as and when we can.

	Proposed starting BBI customer allocations for HVDC and CNI components of the Net Zero Grid Pathways (NZGP) 1.1 MCP	Consult: April - September 2023 <sup>1</sup> Publish decision: TBC
BBCC	Proposed updates to BBC Assumptions book via the Upper South Island Upgrade Project MCP longlist consultation	Consult: August - October 2023 Publish decision: November 2023
	Proposed starting BBI customer allocations for the Otahuhu STATCOM (WUNIVM stage 1b)	Consult: August - October 2023 Publish decision: TBC
<u> </u>	Annual pricing inputs engagement with each transmission customer	Engage September 2023 <sup>2</sup>
BBC	Indicative BBI allocations for PY2024/25	Publish: October 2023
\$	Communicate final pricing for PY2024/25 to each transmission customer	Communicate early December 2023
	Indicative pricing for Upper South Island Upgrade Project MCP shortlist consultation	Consult: December 2023/January 2024
BBCC	Assumptions book update – to incorporate MBIEs EDGS 2023 and minor updates	Consult: TBC <sup>3</sup>

<sup>&</sup>lt;sup>1</sup> Our decision on starting customer allocations will follow any decision by the Commerce Commission (ComCom) to approve the MCP. Further, the ComCom draft decision on Transpower's Capex IM is to raise the base capex threshold to \$30m, which will result in the simple method applying to the NZGP1.1 Wairakei investment. We have paused our work on the Wairakei BBI pending the ComCom final decision (expected December 2023).

<sup>&</sup>lt;sup>2</sup> Including engagement on inputs to indicative BBI allocations for PY2024/25.

<sup>&</sup>lt;sup>3</sup> Consultation will follow MBIEs completion of its electricity demand and generation scenarios (EDGS) 2023.
